health marks a woman much more quickly than it does a man. It destroys the sparkle in her eye, the bloom of health on her cheek, her wivacity of manner, her accidentians.

nervous, petulant and despondent.

Generally ill-health in a woman is due to disorders or derangements of the delicate and important feminine organs which are the cradle of the race. No woman who suffers in this way can retain her good looks or her attractiveness. The daily burden of toturing, dragging pains that she carries, will soon make her a physical wreck, and eventually either kill her or drive her to insanity. Any woman may restore and retain her health and strength in a womanly way by the use of Dr. Pierce's Favorite Prescription. It cures absolutely and completely the weakness and diseases peculiar to her sex. It does away with the necessity for the obnoxious "examinations" and "local treatments" insisted upon by nearly all physicians, and embles her to treat herself in the privacy of her home. It is the invention of Dr. R. V. Pierce, for thirty years chief consulting physician to the Invalids' Hotel and Sorgical Institute, at Buffalo, N. Y. Any woman may consult him by letter free of charge. All correspondence sacredly confidential.

"I was sickly for elatern years with protagonal consulting the protagonal consulting pondence sacredly confidential."
